

LESSON TEN

GROWING YOUR PAPER JUNGLE

SKILLS TO GUIDE YOU

Now that you have the skills to make a variety of plants using crepe paper and cardstock we have so many more plants for you to make and grow your jungle. On the following page we have included some recommended plants for you to try crafting next and a handy checklist for you to mark off as you go!

SHARING what you have made with friends its part of the joy in crafting, we want to challenge you to give one or more of your newly made plants as a gift. Maybe you will inspire them to try making a paper plant as well.

PHOTOGRAPH your plants and share what you have made with us in our Crafters Community or send a quick email to hello@liagriffith.com. We would love to share your projects with our community to help inspire others with your beautiful work.
